

RSA Biomedical nominated for export award

Sep 28th 2009

(Umeå, Sweden) RSA Biomedical has been nominated for the award “Export Company of the Year”. As one of two companies RSA Biomedical has been nominated for their international success with UmRSA® and mdesk™, two market leading orthopedic systems. RSA Biomedical has a majority of the Swedish hospitals as customers but the major part of their business is exported to other countries. The winner will be announced at UmeåGalan held November 12th.

Since the start in 1994 RSA Biomedical has always had a vision of supplying cutting-edge orthopedic measuring systems to the world. Today, UmRSA® and mdesk™ is present in the whole of Scandinavia, the most parts of Europe, and many other places around the world. More than 80% is exported outside Sweden. The winner of the “Export Company of the Year” award will be presented at UmeåGalan, an award ceremony taking place at Nolia near the city centre in Umeå.

About RSA Biomedical

For more than 14 years RSA Biomedical have led the global market in high-precision measurement systems for orthopedics. Since the 1990s the company have contributed to digitalization of orthopedic and radiology imaging technology. They develop their products in Sweden, the pioneering market in digital x-ray imaging systems.
